German Democratic Republic [REDACTED]

MONTHLY LOCOMOTIVE REPORT FOR RED BERLIN (8 pp; German; July 1951)

[REDACTED] 25X1X

25X1X The document [REDACTED] dated 20 August 1951, on steam locomotive operations in the Reichsbahn Directorate Berlin for the month of July. It was issued by the Mechanical Department (IV) of the Directorate.

The information is broken down by railroad operations plants (Bw); by locomotive time spent in operation, in waiting, in maintenance, in reserve, in repair; by locomotive performance (total kilometers, ton-kilometers, daily kilometers, etc.); and by total and specific fuel and lubricant consumption.

Figures of individual Bw's are totaled by railroad divisions (RBA), and the figures for the seven RBA's are totaled again. There are further figures on two narrow-gauge lines, and on inland and international operations of the transit railroad operations plant at the Frankfurt/Oder Shunting Station.

The last page of the report gives an evaluation of the monthly performance. It is stressed that savings in coal consumption have been commendable but that oil consumption was still too high.

[Foreign language document or a microfilm of it [REDACTED] is available from CIA Library, [REDACTED]
